

natura[®] hardwood decking

Natura Hardwood Decking is a harvested timber product and is sourced from Australia's sustainable managed forests.

Natura Hardwood timber decking is a cost efficient alternative to extending and/or building your new home, adding value and longevity.

Creative options are endless with Natura Hardwood - well suited to sloping sites, multi-level and canti-levered construction, pool decking, boardwalks, etc., and is an alternative to brick, tile and paving materials.

Natura Hardwoods are an excellent choice for decking because of their toughness, durability and density and are seasoned to ensure hardness, stability and longevity.

Staining your Natura Hardwood can complement your colour scheme or can be left raw to create a natural weathered look.

When you purchase Natura Hardwoods, you can be assured that you are buying Australian product from an Australian owned and operated company.

the cost efficient alternative to brick, tile and paving materials

- 140 x 35mm dressed and pencil edged all round

Commercial and structural

Naturawood can be used in the construction of timber decks, boardwalks, bridges, jetties as well as a vast majority of other platform and structural applications.

Natura Spotted Gum is particularly referred to as a natural durable species which can enhance your deck by using our structural F14, F17 and F27 in Pergola and Sunshade construction. Commercial decking is available dressed or rough sawn and is available in large section sizes and features the highest strength group rating for superior span capacity.

Further details can be obtained from your Naturawood distributor or consulting structural engineers.

All Naturawood decking timbers are manufactured to Australian Standards 2796. The timbers used are known for their superior strength, durability and stability.

Natura Spotted Gum is a popular and preferred 'Fire Rated' timber by all local councils and government bodies.

The distinctive beauty of natura hardwood

For generations, Australian home owners have enjoyed the warmth, elegance and durability of hardwood timbers.

The unique colours and grains have created stunning features and effects and is today in greater demand for commercial and residential applications.

Over 60 years experience!

NaturaWood, through its parent company The Parkside Group, has been developing and producing quality timbers for over 60 years and is now considered Australia's largest manufacturer of Spotted Gum products.

The product is milled in several locations throughout Queensland and sold nationally and internationally.

All hardwood decking is manufactured from carefully selected seasoned timber and is dried to provide strength, stability and durability.

Colour variations within a timber species is normal. Photographs are only indicative of the colour range.

NaturaWood retains the right to vary specifications without notice due to our policy of continued development in our product range.

Whilst every care has been taken in the preparation of this document, the company cannot accept responsibility for any inaccuracies that may arise and cannot accept liability for loss or damage, either direct or consequential arising out of or in relation to use of the said information. Supply of certain species may at times be restricted due to the unavailability of the resource.

NOTE: On all structural designs, it is recommended that the purchaser consult a structural engineer and all relevant authorities regarding design/building codes and regulations.
